PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer and ICT educator with experience in developing web applications, mobile applications, AI-powered SaaS platforms, and enterprise software solutions. Skilled in React, Next.js, TypeScript, Python, FastAPI, Flutter, PostgreSQL, Docker, cloud deployment, and RESTful APIs. Strong problem-solving, communication, and teaching skills with experience delivering practical technology education.

PROFESSIONAL EXPERIENCE

ICT Teacher

Iran | 2018–2020

Taught Information and Communication Technology to school students, covering computer fundamentals, Microsoft Office, internet safety, and basic programming concepts. Prepared lesson plans, practical activities, assignments, and student assessments.

SELECTED PROJECTS

Makvix AI Platform

Developed an AI-powered WhatsApp automation and CRM platform using FastAPI, React, Next.js, PostgreSQL, and OpenAI.

Aurovix

Built a cross-platform vehicle management application for Android and iOS using Flutter, FastAPI, and PostgreSQL.

Odoo ERP Solutions

Customized ERP modules, automation workflows, reports, and business management systems for commercial clients.

Enterprise Web Applications

Developed corporate websites, portals, dashboards, and booking systems using React, Next.js, Python, and PostgreSQL.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)
Islamic Azad University, Najafabad Branch
Isfahan, Iran | Graduated: 2020
